RECOMMENDED USES

Commercial

Residential

Interior Floor

Interior Wall

Fireplaces

Shower Walls

*Shower Floors

*Honed 2 × 2 Hex Mesh Only

STOCKED SLAB

3/4" (2cm slab) (P)

Calacatta Gold is quarried in the Apuan Mountains near Carrara, Italy. This marble comes from a gallery quarry which means that the quarry is inside the mountain. Because they don't have to contend with the cold winter weather, this quarry runs year round. Blocks still need to be moved down the mountain for slab and tile production so during the winter months snow and ice can limit the amount of blocks that the truckers can transport. The roads to this quarry can be treacherous from December to April. Calacatta Gold will always have a creamy white background with taupe/gold veins. If you are using slab and tile on the same project, you will need to approve the color tone before installation. This product will change from shipment to shipment; therefore, customer approval is required.

Piece to piece variation in shade or color are inherent in all natural stone products; therefore, when installing natural stone tile, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. Pin holes and stun marks are common in this marble.

When installing white marble, you must use a white thinset. Using grey thinset will leave trowel lines and could stain the marble. As a natural stone product, it is recommended that this be sealed to extend its longevity.
