The Outer Limits® Collection includes products designed for outdoor living, featuring slip-resistant porcelain tiles, and countertop materials ideal for outdoor kitchens and exposed environments. Please confirm which exterior surface(s) a product is recommended for in the Products section of our website.

Calacatta Gris is a marble tile that is also part of the Completa Series (CS). It is a white marble with very faint, warm grey details dispersed throughout each piece and it compliments modern and traditional installations alike. Split 4 × 16 tiles are intended to be installed closely together, without a grout joint, so grouting is not recommended.

Because this series is comprised of natural stone, there will be noticeable variations in color and movement between pieces. Therefore, it is important and recommended that a range of this product be viewed before finalizing a purchase. Piece to piece variation in shade or color are inherent in all natural stone products; therefore, when installing natural stone tile, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color.

When installing white marble, you must use a white thinset; using grey thinset will leave trowel lines and could stain the marble. As natural stone products, it is recommended that these be sealed to extend their longevity.
