When installing rectangular or square tiles 15 inches or longer with a staggered joint, it is recommended that the offset should not exceed 33%, unless otherwise specified by the manufacturer.

For packaging information, please contact your local Arizona Tile.

DCOF rating is a measurement of a tile's frictional resistance. It is the specifier's responsibility to ensure the chosen tile is appropriate for each interior and exterior application.

Please view actual material when making your selection, as the images on this page are only representative.

*Shower Floors
Steam Showers
Pool & Spa
* 2 x 2 Mosaic Only

DYNAMIC C.O.F. WET: ≥0.42

P.E.I. RATING: 4

FROSTPROOF: Yes

Icon is a color body porcelain with a concrete look that provides a clean, modern look to any environment. Because this material is a porcelain product, minimal maintenance is required. When mixing sizes within a series, shade, texture and calibration differences should be expected. This series is suitable for residential and commercial applications.

For proper bonding, LFT/LHT mortar for large format and heavy tiles should be used when installing tiles with a dimensional length greater than 15 inches, and rectangular shape and plank tile, per industry standards. Proper thinset coverage is also necessary, and in some cases, back buttering of tile may be required.

Icon Silver Matte 12 x 24 (wall) & Icon Black Matte 12 x 24 (floor)
