

Native Metal

Porcelain Stone®

Native Metal

Porcelain Stone[®]

Inherent to the earth and suspended in the galaxy, metals as rich as gold have been ingrained within our planet since the beginning of time. Native Metal captures the eternal luxury of patinaed minerals and ores in a refreshingly unique ceramic and resin tile line.

Featuring six unique porcelain tiles finished with multiple glaze techniques, Crossville's talented artisans fuse materials into a product made for the generations. Resin wall accents formulated with real metals provide two rectilinear decorative pieces — waves and dots. Create even more impact with mosaics where porcelain and resin seamlessly combine into an extraordinary surface material. Carefully and responsibly made in the USA, Native Metals offers a luxuriously creative approach you can feel good about.

- Rectified field tiles
- Metallic visual texture
- Floor and wall mosaics available
- Recommended grout joint: 3mm
- Entirely American-made

Wet Dynamic Coefficient of Friction Range

UPS	0.50 - 0.60	ANSI A326.3
-----	-------------	-------------

Shade & Texture Index

Native Metal has a shade variation of V3.

V1	V2	V3	V4	V1 Uniform appearance
				V2 Slight Variation
				V3 Moderate Variation
				V4 Substantial Variation

This porcelain tile product is produced with a V3 variation. While the colors and/or textures present on a single piece of tile will be indicative of the colors and/or textures to be expected on the other tiles, the amount of colors and/or texture on each piece may vary significantly. It is recommended that the range be viewed before selection.

Recommended Use

Native Metal is recommended for interior floors, interior walls, countertops, exterior walls, pool waterlines and full linings† in both residential and commercial applications. Native Metal is not recommended for exterior horizontal surfaces or exterior paving. The Mixed Hex Mosaics and the 2 x 12 Deco pieces are to be used on interior walls only. See CrossvilleInc.com for detailed installation instructions.

† Excludes mesh mounted mosaics.

Wet area use for Native Metal Mosaics

Crossville® produces the Native Metal 2 x 2 mosaics with the Cross-Sheen (UPS) finish. The ANSI A326.3 wet Dynamic COF of Native Metal is ≥ 0.42 . Their small sizes ensure frequent grout joints which provides traction and drainage. Crossville cannot control situations involving incorrect installation, improper slope to the drain for elimination of standing water and poor surface cleaning. This information is provided so that customers may make a realistic and informed decision when comparing Native Metal to other tile products in wet area environments, such as residential/commercial bathrooms, showers, and interior pool decks.

Care and Maintenance

Regular cleaning is the best way to keep Native Metal tile looking good for years to come. Use clean, hot water (combined with a household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth. No waxes are needed. More information regarding the care and maintenance of Crossville® products is available at CrossvilleInc.com.

Our Warranty

Crossville Inc. guarantees that its products will meet or exceed the performance specifications outlined in ANSI A137.1- 2022 and in the performance data section of the Crossville, Inc. general product catalog. For complete details check our website at CrossvilleInc.com.
