Majesto collection

The Majesto collection captures the beauty and architectural presence of natural stone—reimagined in enduring Colorsync porcelain. Drawing inspiration from marble's classic veining, limestone's earthy refinement, quartzite's crystalline depth, and the organic texture of travertine, this expansive series brings together the full spectrum of stone's expressive potential.

Each surface is a tribute to the material's geological origin, crafted with precision and reverence to convey both heritage and modernity. United by a palette of elevated neutrals and dynamic patterns, Majesto offers designers and architects a singular resource—Anatolia's most comprehensive natural stone-inspired offering to date. More than a collection, Majesto is a foundation for lasting design: timeless, commanding, and composed with quiet grandeur.

Key highlights

Majesto is comprehensive and versatile with a wide selection of premium designs, refined colors, compelling formats and variability of sizes including rectified Sintered Slabs (160 x 320 x 0.6 cm), rectified Porcelain Slabs (120 x 280 x 0.6 cm), up to 6 modular tile formats, 2 formats of 2 cm pavers, and 2 in Hexagon Mosaics. The extensive selection of colors in Majesto are presented in a selection of finishes out of a total of five available in the portfolio. The refined palette of finishes includes Polished, Honed, Organic Matte, Vintage, and Grained—each finish is selected to elevate the design's character, reflecting the authenticity of each design, while fulfilling both aesthetic and technical demands.

Tesis; şirketin araştırma-geliştirme departmanını, showroomlarını ve ofislerini barındıran, son teknolojiye sahip üretim tesisi ve lojistik merkeziyle büyük bir inovasyon üssüdür.

EN ARCHITECTURAL DESIGN

Designed in partnership with Canadian studio Micacchi Architecture, the facility emphasizes and is a testament to Anatolia's passion for design and penchant for innovation. It features three distinct structures that, together, form an integrated production and design unit. The first is the main administrative building, a grand and refined architectural masterpiece that houses office space, showrooms, and research and product development labs. Simply walking through the space takes one on a visual journey through Anatolia's aesthetic vision.

The building adjoins a production plant with a capacity to expand to eleven lines equipped with advanced manufacturing equipment for producing tiles and slabs. The plant is conceived as a space for designers to experiment with materials and diverse methods to bring novel products to life.

Finally, an adjacent centralized storage space ensures the efficient and monitored gathering of both raw materials and finished products. With an impressive 2,267,450 ft^2 / 210,653 m^2, the facility is one of the largest and most technologically advanced in the world.

FR CONCEPTION ARCHITECTURALE

Conçue en collaboration avec le studio canadien Micacchi Architecture, cette installation illustre parfaitement la passion d'Anatolia pour le design ainsi que son engagement envers l'innovation. Elle se compose de trois structures distinctes qui, réunies, forment une unité intégrée de production et de conception. La première est le bâtiment administratif principal, un chef-d'œuvre architectural grandiose et raffiné qui abrite des bureaux, des salles d'exposition et des laboratoires de recherche et de développement de produits. Il suffit de traverser cet espace pour être transporté dans un voyage visuel à travers la vision esthétique d'Anatolia. Le bâtiment est adjacent à une usine de production pouvant être agrandie jusqu'à onze lignes équipées de matériel de fabrication de pointe pour la production de carreaux et de dalles. L'usine est conçue comme un espace où les designers peuvent expérimenter différents matériaux et méthodes afin de donner vie à des produits novateurs. Enfin, un espace de stockage centralisé adjacent assure la collecte efficace et contrôlée des matières premières et des produits finis. Avec une superficie impressionnante de 210 653 m^2, cette installation est l'une des plus grandes et des plus avancées technologiquement au monde.

ES DISEÑO ARQUITECTÓNICO

Diseñada en colaboración con el estudio canadiense Micacchi Architecture, la instalación destaca y es testimonio de la pasión de Anatolia por el diseño y su inclinación por la innovación. Cuenta con tres estructuras diferenciadas que, juntas, forman una unidad integrada de producción y diseño. La primera es el edificio administrativo principal, una obra maestra arquitectónica grandiosa y refinada que alberga oficinas, salas de exposición y laboratorios de investigación y desarrollo de productos. El simple hecho de recorrer el espacio supone un viaje visual a través de la visión estética de Anatolia. El edificio está contiguo a una planta de producción con capacidad para ampliarse a once líneas equipadas con avanzados equipos de fabricación para la producción de baldosas y losas. La planta está concebida como un espacio para que los diseñadores experimenten con materiales y métodos diversos para dar vida a productos novedosos. Por último, un espacio de almacenamiento centralizado adyacente garantiza la recogida eficiente y controlada tanto de las materias primas como de los productos acabados. Con una impresionante superficie de 210 653 m^2, la instalación es una de las más grandes y tecnológicamente avanzadas del mundo.

TR MİMARİ TASARIM

Kanadalı Micacchi Architecture iş birliğiyle tasarlanan tesis, Anatolia'nın tasarıma olan tutkusunun ve yenilikçi yaklaşımının bir göstergesidir. İlki; ofis alanlarını, showroomları ve araştırma-geliştirme laboratuvarlarını barındıran, görkemli ve rafine bir mimari başyapıt olan ana idari binadır. Binada dolaşmak, Anatolia'nın estetik vizyonunda bir yolculuğa çıkmak gibidir. Bitişik konumdaki üretim tesisi, karo ve plaka üretimi için ileri üretim ekipmanlarıyla donatılmış, on bir hatta kadar kapasiteye sahip olacak şekilde tasarlanmıştır. Bu alan aynı zamanda tasarımcıların malzemeler ve farklı yöntemler üzerinde deneyler yaparak yeni ürünler geliştirebilecekleri bir yaratıcılık platformu olarak düşünülmüştür. Son olarak, yanındaki merkezi depolama alanı, hammadde ve bitmiş ürünlerin verimli ve kontrollü bir şekilde toplanmasını sağlar. Toplamda 210.653 m^2 (2.267.450 ft^2) alana sahip olan tesis, dünyanın en büyük ve en ileri teknolojiye sahip üretim komplekslerinden biridir.

SOLAR PANELS

EN Cutting-edge solar panels, encompassing the entire roof of the facilities at a total of 2,267,450 sq ft / 210,653 m^2, have been installed and generate an impressive 21.5 MW of energy. This substantial output will fulfill a significant portion of the energy needs of our production plant, while concurrently facilitating a substantial reduction of carbon emissions. This environmentally conscious initiative will effectively prevent the release of 19,000 tons of carbon into the atmosphere annually.

FR PANNEAUX SOLAIRES – Des panneaux solaires à la pointe de la technologie, couvrant la totalité de la toiture des installations sur une surface totale de 210 653 m^2 génèrent une quantité impressionnante d'énergie de 21,5 MW. Cette production substantielle répondra à une grande partie des besoins énergétiques de notre usine de production, tout en facilitant une réduction substantielle des émissions de carbone. Cette initiative respectueuse de l'environnement permettra d'éviter le rejet de 19 000 tonnes de carbone dans l'atmosphère chaque année.

ES PANELES SOLARES – Se están instalando paneles solares de última generación en la totalidad de los 2.267.450 ft^2 / 210.653 m^2 del techo de la planta, con miras a generar 21,5 MW de energía. Se prevé que ese importante aporte satisfará buena parte de los requerimientos energéticos de nuestra planta de fabricación, promoviendo a la vez una baja significativa en la emisión de gases de efecto invernadero. Esta iniciativa planteada con conciencia ambiental efectivamente impedirá que cada año se viertan 19.000 toneladas de anhídrido carbónico a la atmósfera.

TR GÜNEŞ PANELLERİ – Toplamda 2.267.450 fit kare / 210.653 metrekarelik alanın tüm çatısını kaplayan son teknoloji güneş panelleri kuruldu ve 21,5 MW gibi etkileyici seviyede enerji üretilmektedir. Bu önemli çıktı sayesinde üretim tesisimizin enerji ihtiyacının önemli bir bölümü karşılanırken, aynı zamanda karbon emisyonlarında önemli ölçüde azalma sağlaması beklenmektedir. Bu çevre dostu girişim, yılda 19.000 ton karbonun atmosfere salınmasını etkili bir şekilde önleyecektir.
