RECYCLED CONTENT

The Spark series is a ceramic wall tile designed to emulate hand-crafted tile. It boasts a range of textures and slight glaze variation from piece to piece. With an understated elegance, each of these details combine to create visual interest in any setting. Available in 5 × 5, 3 × 12, Hex, Picket and Pencil Bullnose trim, all items are offered in Matte finish with the Hex and Picket available in both Glossy and Matte finishes. This series offers many layout possibilities to add a distinctive design element to any project.

Because this product mimics a hand-made tile, there can be noticeable variances between pieces, so it is important and recommended that a range of this product be viewed before finalizing a purchase.

Piece to piece variation in shade or color are inherent in all fired clay products; therefore, it is recommended to mix tiles from several boxes at a time during installation to achieve the best range of color. This series is suitable for vertical surface applications in both residential and commercial projects.

For packaging information, please contact your local Arizona Tile.

*DCOF rating is a measurement of a tile's frictional resistance. It is the specifier's responsibility to ensure the chosen tile is appropriate for each interior and exterior application.*

Please view actual material when making your selection, as the images on this page are only representative.
